EDUCATION

California State University, Fullerton — Bachelor's / Dean's List
Business Administration - Entrepreneurship

LearningFuze, Irvine, CA — Web Development Program

Unitek, Fremont, CA — Cisco Networking (CCNA) Development Program

APPLICATIONS

Ding

- A meal planning developed through the **Agile** process using **JavaScript, React, PHP, MySQL, CSS3** and **Materialize**
- Based on user input of allergy or dietary restrictions, we present random recipes that are safe for that user
- Includes instructions, ingredients, nutritional info and a picture
- Created a **MySQL** database by pulling and filtering large amounts of data from the Spoonacular recipe **API**
- Worked on backend development, using **PHP** to serve **JSON** data from the **MySQL** database to the frontend

Nature Connect (Hackathon)

- A digital recreation of the classic game, Connect 4
- Implemented a computer opponent for single players
- Worked on the logic, primarily in **JavaScript** and the structure and styling in **HTML5** and **CSS3**

trailMix (Hackathon)

- A hiking oriented event planner
- Utilized the following **APIs**: Google Maps, Google Places, Google Directions, Google Geolocation, Dark Sky (weather) and Hiking
- Based on location we provide details on a hiking trail, directions to it, and weather in the area for a specified date
- Charged with **ReactJS**, including both **Axios** and **AJAX** calls, combining **JSX** with **CSS3** to make a cohesive style across components

Handicapped SCUBA Association (Charity Hackathon)

- Improved the website for a non-profit dedicated to helping people with handicaps learn to SCUBA dive
- Cleaned up the **SQL** database in order to prevent duplicates, remove outdated information and give a uniformity in styling
